Austin, Tx

About

I am a full stack software engineer with over 3 years of experience. I moved to Austin TX for the opportunity to work at General Motors. I am looking to take the skills and experience that I have gained and apply them in a new role. I am most comfortable with the back-end engineering and development, but have experience across the whole stack.

Experience

SOFTWARE ENGINEER, GENERAL MOTORS— JAN 2023 - PRESENT

I was promoted out of the new college hire program after 2 years, and remained on the same team. At this time I am the lead backup automation engineer on the team developing the backup framework using Dell's NetWorker and DataDomain backup solution products. The backup team is responsible for backing up over 30,000 servers daily.

SOFTWARE DEVELOPER - NEW COLLEGE HIRE, GENERAL MOTORS— JAN 2021 – JAN 2023

I was brought into GM as a software developer through their new college hire program. I was placed on the Storage Automation team within the Enterprise Technology Services division of GM IT. The team manages the full stack of development of an internal storage automation front end and back end. Initially I worked on various bugs and smaller features across the range of storage offerings. Then I focused on the backup automation portion of the framework.

TECHNICAL EXPERT, APPLE RETAIL— JAN 2019 - AUG 2019

TECHNICAL SPECIALIST, APPLE RETAIL— JULY 2017- JAN 2019

PRODUCT SPECIALIST, APPLE RETAIL— NOV 2016 - JULY 2017

I worked at the Apple store part-time while I was in college. I started as a product specialist helping customers with their in-store purchases. I switched to working at the Genius Bar as a technical specialist helping customers with their technical issues. I was promoted to technical expert where I would repair broken devices as well as assist customers in their appointments.

Skills

Python, Django, Django REST Framework, JavaScript, HTML, CSS, SQL, C/C++, HTTP Requests, REST API's
